

WORKPLACE Test & Tag NSW

Workplace Test & Tag (NSW) has been assisting Illawarra workplaces with electrical safety, and keeping them in line with the current Work Health & Safety Legislation since 2015.

WHS legislation outlines that if you are a business, employer or other PCBU, you must make sure that electrical equipment is regularly inspected and tested by a competent person if the electrical equipment is:

- Supplied with electricity through an electrical socket outlet ('plug in' equipment), and
- Used in an environment in which its normal use exposes the equipment to operating conditions that are likely to result in damage to the equipment or a reduction in its expected life span, eg conditions such as moisture, heat, vibration, mechanical damage, corrosive chemicals or dust.

We can help you to identify the specific requirements for your business, in terms of what equipment needs to be tested and the frequency of testing required.

Our service includes:

- Electrical Inspection and testing & tagging of all cord-connected appliances, RCD's (Fixed and Portable) and Cord Sets. 3 phase and single phase.
- Detailed Electronic Report and Asset register.
- Electrical Appliance Risk assessments.
- Repair Service (Plug and Socket).

Our Staff are fully trained and use the latest Metrel PAT testers, printed tags with QR codes for offices and Heavy duty Custom Tags for Tools etc. All staff have obtained up to date Police Checks, Whitecards & Working with Children Checks.

Our friendly staff are ready to assist. Contact us today to prioritise the safety of your staff and clients, and to ensure your business meets and continues to fulfill its WHS obligations.
